## Shipping Information for Online Classes: Guilds and Groups

- When you organise for your group or guild to do an online class with Hazel, we ship the kits to you in one shipment.
- Each participant receives a full project kit along with a smaller 'teaching' pack in one combined pack. The teaching pack consists of a doodle cloth and a range of threads and beads. The object of this pack is for participants to learn the stitches and techniques on the doodle cloth, using threads and beads that do not form part of the project kit.
- The prices quoted for these kits include the shipping and customs duty costs. We pay those.
- Below is a costing exercise which shows that a bulk shipment from our end is measurably cheaper than shipping the kits individually so, we ship to one designated person who then sends the individual combined packs on to the workshop participants. The comparisons were worked out using an average kit size of 250 grams but of course, this will vary depending on what is in each individual bulk parcel.
- If we are given the names and addresses of the participants, we will print sheets of sticky address labels which we will enclose in the bulk shipment. This makes onward shipping easier for the person who must do it.
- We do it this way because the shipping companies work on a sliding scale which means that the heavier the parcel, the cheaper it is per gram making the shipping cost for each kit anything up to 80% cheaper and therefore more affordable for prospective participants.
